

The **Covid-19 Open-Data** project would like to invite you to...

[OPEN DATA DAY](#): March 6, 2021

## What is Open Data Day?

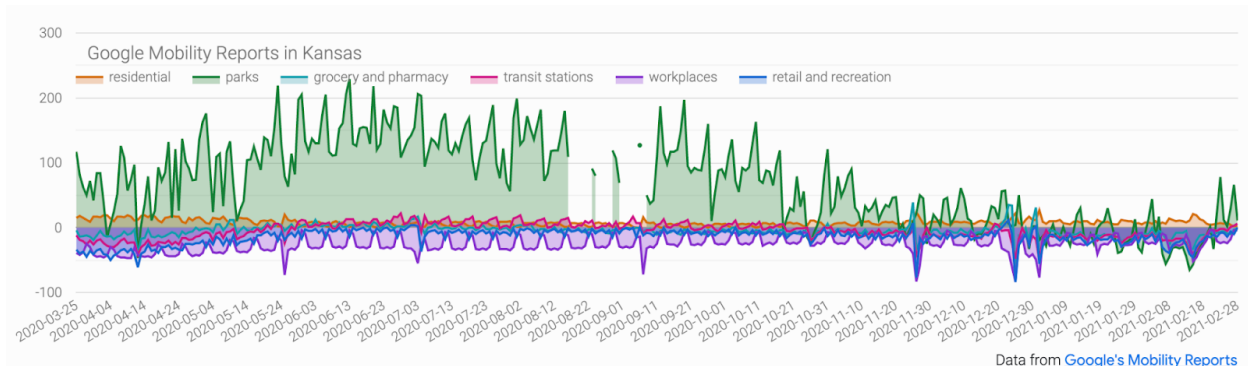

*Open Data Day is an annual celebration of open data all over the world. Groups from around the world create local events on the day where they will use open data in their communities. It is an opportunity to show the benefits of open data and encourage the adoption of open data policies in government, business and civil society.*

## What is the Covid-19 Open-Data Project?

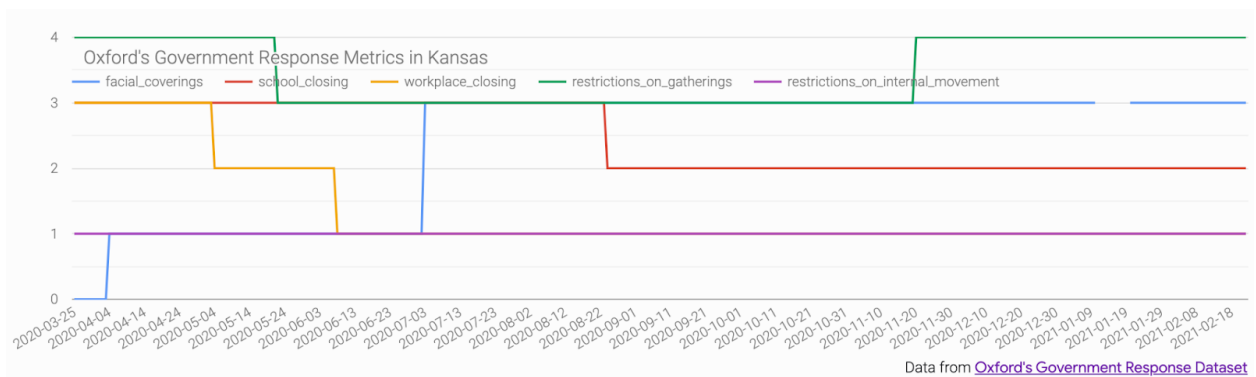

*The Covid-19 Open-Data project would like to showcase the largest Covid-19 epidemiological database available in addition to a powerful set of expansive covariates. It includes open sourced data with a permissive license (enabling commercial use) relating to vaccinations, epidemiology, hospitalizations, demographics, economy, geography, health, mobility, government response, weather, and more. Moreover, the data merges daily time-series from hundreds of data sources at a fine spatial resolution, containing over 20,000 locations and using a consistent set of region keys.*

*For **policymakers**, we humbly offer ways to auto-magically generate data visualizations that express thousand words (or **sentiments**) from anywhere in the world to aid in governance...*

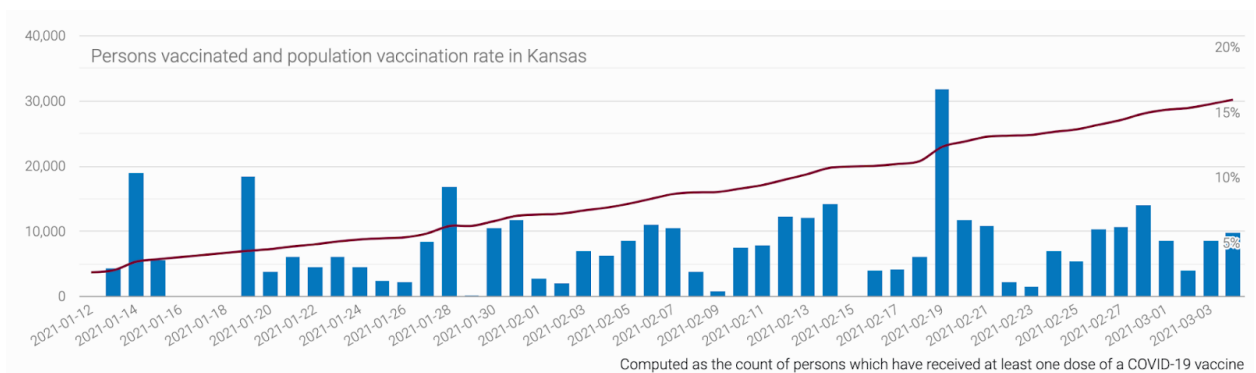

Where are folks hanging out today? Are folks mostly staying home? How safe do we feel about visiting parks, grocery stores, riding the bus, or going to work?

Are folks wearing masks? Are schools closed? Are people still choosing to go to work?

...overlaid with how we feel about vaccination!

**YES** - we have international **vaccine data**!
